Pakistan: IDPs staying in Host Communities
MCRAM (Multi-cluster rapid assessment mechanism) survey

Map showing number of households surveyed by district, number of IDPs and persons within host community residing in a surveyed household hosting IDPs, length of stay in household and overall population

The figures presented in this map are from the McRAM assessment of IDPs carried out in June 2009. (Source: WFP 2009)

The purpose of this map is to show the impact on the host communities by illustrating the large number of both IDPs and host community persons affected from the relatively small number of households surveyed.

Population data is Pakistan Census 1998. (Source: Pakistan Population Census Organisation)
