

The Global Rainfall-Triggered Landslide Hazard Map presents a quantitative representation of landslide hazard. This component is the mean annual rainfall-triggered landslide hazard assessment for the period 1980 – 2018. Raster values represent the modelled average annual frequency of significant rainfall-triggered landslides per sq. km.

Average annual frequency of significant Rainfall-triggered landslides per sq. km.

Transport

- Airport
- Seaport
- Primary road
- Secondary road
- Tertiary road

Boundary

- District
- International
- Coastline

Settlement

- Town
- Village
- Community
- Other

Data Sources

Landslide risk: World Bank
Settlements: Statistical Institute of Belize
Transport: OpenStreetMap, OurAirports, World Port Index
Boundaries: NEMO, UN
