Situation in most affected areas as of 27 May:

* Flooding started to recede.
* Most cities entering cleanup phase, but several cities continue to be severely affected.
* Critical infrastructure compromised including industrial sites near river and excavation mines.
* Numerous landslides and subsequent damage to buildings and roads, many road closures.
* Agricultural losses in flooded area widespread.
* Minor perceived fear of landmines.

International response as of 27 May:

* High capacity pumping operations continue to be concentrated in Belgrade-Obrenovac.
* Further high capacity and other pumping operations in several locations ongoing although now reducing in number.
* High capacity water purification facilities being deployed.
* Landslides and risk of further landslides being assessed.
* Agricultural losses being assessed.
