

Map showing modelled volcanic hazards specifically landslides and possible eruption routes for lahars. This data was created before the eruptions of 2021 and are only indicative of where these types of events might occur.

Route for potential lahars

Type of landslide

- Debris flow
- Debris slide
- Deep seated rockslide
- Rockslide
- Shallow landslide
- Stream flood debris flow
- Volcano

Settlements

- Village
- Hamlet

Borders

PARISH

Roads

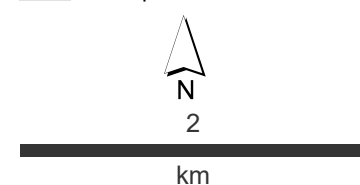

- Primary
- Tertiary

Physical

- River
- Stream

Landuse

- Built up areas

Data Sources

GADM, OpenStreetMap, SRTM, GeoCris, UWISeismic
