The map provides an overview of drought and crop conditions as reported through household surveys from 6-15th November 2021. The bar charts provide the percentage reported responses on drought length and crop losses. For example, in Galole 100% of respondents reported drought for over 6 months, and the bar is therefore completely red. The map also shows targeted number of households by sub-county for the planned and ongoing multi-purpose cash program implemented by the ASAL Humanitarian Network since November 2021.

Data Sources

Household Survey Responses - Crop Losses

- **Drought length (by % responses)**
  - >6 Months
  - 6 Months
  - 3 Months

- **Did you face crop losses due to the drought?**
  - Yes
  - No

- **Do you expect the next harvest to be below average?**
  - (of your most important crop)
    - Yes
    - No
